The following are the divisions in which we are expertise in providing the Services.

- **Sewage Treatment Plants**
- **Effluent Treatment Plants**
- **R.O. & Softeners Plants**
- **O & M services (AMC & CMC)**
- **Other Environmental Services**

## SEWAGE TREATMENT PLANTS

Sewage Water Treatment Plant is one of the feasible and cost effective ways to treat reusable water. Our high quality Biological Sewage Treatment Plant effectively removes the varied contaminants from the sewage water. Sewage Treatment Plant is manufactured from the premium quality raw materials that add efficiency. Rugged structure, easy installation and excellent performance are the salient features of our Sewage Treatment Plant that

make it perfect for gardening and toilet flushing purposes. We have firmly positioned ourselves as water treatment consultant for many Hotels, Hospitals, Commercial Places, Automobile servicing stations etc.

## EFFLUENT TREATMENT PLANTS

These effluent treatment plants are used for purifying waste material that is an industrial waste

These treatment plants help in solving environmental pollution issues without exposing same to open environment

These effluent treatment plants are known for saving energy and removing pollution effluent with economical operations and also meet stringent pollution control norms

These effluent treatment plants can treat effluent coming from different areas of plant

## R.O. PLANTS

We provide a large range of high quality R. O. Plant that is widely used for drinking as well as industrial water treatment. Our Ro Water Plant is developed from the optimum quality raw materials keeping in mind the national and international quality standards. Reverse osmosis plant removes microbiological impurities; dissolve salts, pesticides, chemicals and many other dissolved solids from the water and makes it suitable for several purposes.
